## PROBLEM

Located in Pune Hinjewadi SEZ, the business in question works in 13 countries and has a vast recruitment process spanning multiple timezones. Consequently recruiters work round the clock in shortlisting candidate resumes and sharing them with analysts for reformatting and uploading to client portal. The India team also works round the clock in 3 shifts to deliver resumes.

During peak season, the business sees 300-500 resumes a day and a team of 25-30 analysts is needed to support this demand.

## HOW RESUMOD HELPED

1. Resumod provided the analyst team with a Dashboard, In-built parser and builder.
2. Dashboard supports multiple agent logins, along with an email inbox where recruiters can directly send resumes that need to be processed.
3. Agents can parse and reformat 100 resumes in one go through bulk (zip) upload as well as email upload.
4. Parser uses advanced skills taxonomy to identify and auto pick skills from resumes and list them down. Parser also calculates total years of experience.
5. Builder provides additional functionality to check and review each resume.
6. Dashboard provides functionality to use labels, filters, sort and mark resumes.

## RESULTS

**67% decrease  
in Resume  
Processing Time**

From 60 min to 20 min.

**50% decrease  
in Manpower Cost**

Team size optimized from  
25 to 12 agents

**2x increase  
in Positions Closure**

With an increased productivity  
the team was able to close twice  
the number of positions in the  
same time

Why you should

## TALK TO RESUMOD
